## Trigger Operation Diagram

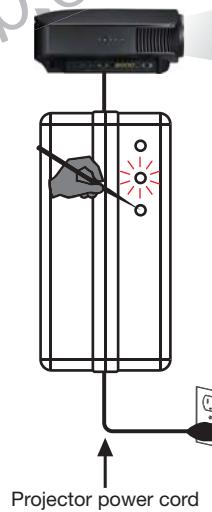

## Instructions

Disconnect the power cord from the power outlet on your Elite Screens electric screen. Unplug the projector's power cord and connect it to the trigger as shown above (Fig. 1). Follow by the synchronization process.

1. Connect the trigger power cord, light turns red after connection
2. Press & hold **[Button 1]** with a sharp object, do not release until after step 4
3. Connect the electric screen's power cord into the outlet while holding down **[Button 1]**
4. Trigger light will start to blink red
5. Release **[Button 1]** after 3 seconds (screen will drop automatically). Light blinks blue after release

6. Connect the trigger power cable to the projector
7. Turn on the projector, press & hold **[Button 2]** for 3 seconds
8. Light will blink red to indicate synchronization
9. Synchronization is now complete. Test the synchronization by turning the projector off, screen will retract automatically if the synchronization is successful.

NOTE: Operation range for ZU12V is 25 meters. ZU12V is only compatible with Elite's electric screens.
